PROFESSIONAL SUMMARY

Results-driven B.Sc. IT graduate with hands-on experience in full-stack web development, REST API design, authentication systems, and database management. Skilled in Python, Django, Django REST Framework, React.js, MySQL, and MongoDB. Built and deployed full-stack applications covering e-commerce workflows, CMS, and attendance management. Strong understanding of data structures, algorithms, and scalable application architecture.

TECHNICAL SKILLS

Languages Python, JavaScript, HTML, CSS

Frameworks Django, Django REST Framework, Node.js, Express.js, React.js

Databases MySQL, MongoDB, Redis

Tools Git, GitHub, CI/CD Pipelines, AWS

Others REST API, JWT Authentication, Role-Based Access Control

WORK EXPERIENCE

Full Stack Web Developer Intern — Rapid Soft Logics Pvt. Ltd., Thane

2025 – Present

- Contributed to 15+ API integrations across Python-based applications, enabling e-commerce workflows, content management, and appointment scheduling features.
- Built secure backend services with JWT-based authentication and role-based access control, safeguarding 10+ CRUD API operations and ensuring data integrity.
- Designed and optimized MySQL database schemas, queries, and relationships to support scalable application data models.
- Collaborated with frontend team for smooth API integration and participated in code reviews to maintain code quality.

PROJECTS

AI Attendance Tracking System Django | DRF | React | MySQL | JWT

- Built a full-stack attendance management platform with Django REST Framework and React, featuring JWT authentication and role-based access.
- Implemented automated attendance calculations, duplicate-entry prevention, and department-wise reporting across multiple modules.
- Designed and integrated 15+ backend endpoints covering attendance workflows, request management, and user administration.

AI-Powered Content Management System (CMS) Django | Tailwind CSS | Groq LLM API | MySQL

- Developed a complete CMS with authentication, content publishing, media management, and AI chatbot integration using Groq LLM API.
- Built full CRUD workflows, search and pagination, analytics dashboards, and REST API endpoints across multiple application modules.

AI-Powered Stack Planner Tracker Django | Python | REST API | Groq AI

- Built a Django-based task and stack planning tracker with REST API endpoints for creating, updating, and managing project goals and tech stack decisions.
- Integrated Groq AI to provide intelligent suggestions for tech stack selection and task prioritization based on project requirements.
- Implemented user authentication, structured data models, and a clean API layer to support dynamic planning workflows and progress tracking.

EDUCATION

B.Sc. Information Technology — KB College of Science & Arts, Navi Mumbai
2025

CGPA: 7.65 / 10

CERTIFICATIONS

- Certification of Internship – Data Science Intern** Unified Mentor | May 2025
